EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Godfried Akorli on March 3, 2004.

The application has been amended as follows:

Cancel claim 6.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate or render obvious the claimed process for the preparation of 3,4-diaminobenzenesulphonic acid. The closest prior art process is disclosed in U.S. Patent 4,808,342. This patent discloses a process for the preparation of sulfonated aromatic amines wherein the corresponding amine is reacted with sulfuric acid in the presence of a sufficient excess of sulfuric acid to act as the reaction solvent at a temperature of 180-230 C. The reaction mixture is cooled then water is added to a sulfuric acid concentration of 30 to 75%. The sulfonated aromatic amine precipitates and is filtered off. The process of the reference differs from that claimed in that it does not specifically mention that 3,4-diaminobenzenesulphonic acid and in that the temperature at which the reaction is carried out is higher than that claimed. The reference provides no motivation to modify the process disclosed therein to arrive at the claimed process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
